The following charts convert decimals in pounds into the ounces equivalent and feet inches into inches. Some conversions are rounded numbers and not exact mathematical equivalents. The figures are provided for the purpose of entering anthropometric measurements in WIC WISE.

I. Weight Conversion – Decimals in Pounds into Ounces

Decimals in Pounds	Equals	Ounces
.1	=	2
.2	=	3
.3	=	5
.4	=	6
.5	=	8
.6	=	10
.7	=	11
.8	=	13
.9	=	14

A. Converting Weights in Kilograms to Pounds and Ounces

You may also receive weight measurements in kilograms instead of pounds.

1. Convert the weight to pounds, and tenths of pounds (decimals) by multiplying the kilograms by 2.21.
2. Use the conversion factor and chart above to convert the weight to pounds and ounces.

Example:

Weight on referral sheet: 13.4 kilograms.

$13.4 \times 2.21 = 29.61$ pounds

29.61 pounds = 29 pounds 10 ounces

A. WIC WISE height is entered as inches and $\frac{1}{4}$ inches, rounded to the nearest $\frac{1}{4}$ inch:

- $.25 = \frac{1}{4}$ (enter 1 in the $\frac{1}{4}$ column)
- $.50 = \frac{2}{4}$ (enter 2 in the $\frac{1}{4}$ column); note $\frac{2}{4} = \frac{1}{2}$
- $.75 = \frac{3}{4}$ (enter 3 in the $\frac{1}{4}$ column)

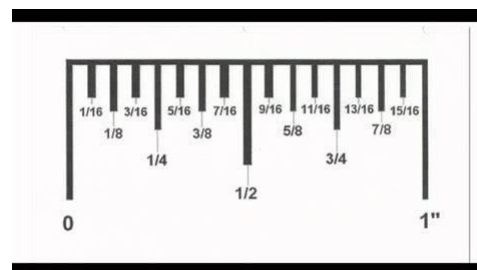

Figure 1. Ruler showing 0 to 1 inch with fractional tick marks.

Examples:

- Participant is 3' 4.56", it would be $36" + 4.56" = 40.56"$. In WIC WISE enter 40 in the *in field & 2 in the $\frac{1}{4}$ field.

Height		
* in	* $\frac{1}{4}$	R/S
40	2	

Figure 2. WIC WISE fields showing the recorded 40.56" height measurement.

- Participant is 2' 7.82", it would be $24" + 7.82" = 31.82"$. In WIC WISE enter 31 in the *in field & 3 in the $\frac{1}{4}$ field.

Height		
* in	* $\frac{1}{4}$	R/S
31	3
