

MI-WIC POLICY

System Management

10.00 System Management

Effective Date: 02/06/2026

10.03 System Security and MI-WIC Access

PURPOSE: To provide process requirements local agencies must follow to protect client confidentiality, authorize access to the MI-WIC System, and prevent theft of system-related equipment.

DEFINITIONS:

Privileged user means a user that is authorized to perform security-relevant functions that ordinary users are not authorized to perform, such as approval of access requests to MI-WIC and role assignment.

A. POLICY

1. System-related equipment and telecommunication resources that are purchased with WIC funds must be used for business purposes only.
2. Local agencies are responsible for maintaining security measures to safeguard all WIC system-related equipment. Including:
 - a. Stationary computers will be equipped, when reasonable, with devices that secure hardware and deter theft.
 - b. Portable equipment will be under the supervision of clinic staff and will be stored securely.
 - c. Local agencies will maintain current anti-virus software on all WIC computers used for MI-WIC.
 - d. Local agencies will maintain a supported operating system on all WIC computers used for MI-WIC. (See Exhibit 10.02A MI-WIC Workstation Configuration Procedures.)
 - e. All computer workstations must be positioned or located in a manner that will protect and minimize the exposure of any client data from unauthorized persons.
 - f. Local agency staff must comply with state and federal laws and regulations regarding the proper acquisition, use and copying of copyrighted software and commercial software licenses.

3. User Requirements for System Security

- a. Only local agency staff that directly provide WIC services or supervise staff that provide WIC services will be granted access to the MI-WIC system.
- b. State workers must register at the MILogin website at <https://miloginworker.michigan.gov> and Third Party / Local Agency staff must register at <https://milogintp.michigan.gov> to obtain their own distinct account prior to subscribing to MI-WIC. (See Exhibit 10.03A Creating a State of Michigan MILogin Account for State and Third-Party Users and Subscribing to MI-WIC.)
- c. User IDs and passwords to access computer devices, MILogin, and software applications must be stored in a secure manner and not be shared with other individuals.
- d. Each MI-WIC data system user will read and electronically acknowledge the MI-WIC User Security and Confidentiality Agreement prior to accessing the MI-WIC application after they have established a MILogin account. This agreement is displayed as a pop-up when a user first attempts to access the application and every time this document is updated.
 - i. The staff must also sign, and the agency retain, [Employee Confidentiality and Compliance Agreement Signature Form](#). (See Policy 9.02 Employee Compliance, Exhibit 9.02A Employee Confidentiality and Compliance Agreement Signature Form.)
 - ii. When staff work at more than one local agency, they must create separate User IDs: one for each agency.
- e. Staff that have not logged in to the system for over 60 days will have their access terminated.

4. State and local agency supervisory staff roles and responsibilities for System Security.

- a. Supervisory staff are responsible for the maintenance of all clinic users' access to the MI-WIC system within their local agency. This includes:
 - i. Approving and denying new subscribers.
 - ii. Adding or removing roles for current WIC staff.
 - iii. Removing access from staff whose employment has ended.
 - iv. Removing access from staff who are on extended leave.
- b. At the time a WIC staff permanently leaves employment with their agency, supervisory staff must complete the following actions in MI-WIC within 24 hours:

MI-WIC POLICY

System Management

- i. Add a termination date for all roles on the LA Roles screen.
 - ii. Request removal of all State level roles on the State Level Roles screen.
 - iii. Remove clinics assigned to the staff member on the User Agencies screen.
 - iv. Add a termination date on the User Access Request screen.
- c. If a WIC staff will be on extended leave for greater than 3 weeks, supervisory staff must:
 - i. Insert the staff member's first date of leave into the termination date field of the User Access Request screen. This removes their access to the MI-WIC system but preserves their clinic and role assignments until reactivated.
- d. Supervisory staff must contact the MI-WIC System Administrator if they identify a user that does not belong in their agency, or they have an issue denying an access request in MI- WIC.
- e. Supervisory staff must assign appropriate clinic and roles based on the user's location of work, responsibilities within the clinic, and staff qualifications. (See Policy 1.07, Local Agency Staffing and Training.)
- f. To maintain separation of duties at the clinic level, the supervisory staff must ensure that a single staff is not assigned full access to the system unless the clinic is designated as a Temporary or Permanent Single Staff Clinic. (See Policy 9.03, Employee Conflict of Interest and Separation of Duties.)
- g. Supervisory staff must review all their staff roles annually in MI-WIC to verify that the roles assigned to their staff are appropriate and necessary for the completion of their assigned duties.
- h. Supervisory staff must review staff roles of privileged users, semi-annually.
- i. In the absence of supervisory staff, and a designated staff responsible for role changes, a local agency staff can request a role change by calling the State WIC office or emailing the MI-WIC System Administrator directly.
